

1 Society of Skeletal Radiology
2 Annual Business Meeting
3 Sunday, March 9, 2008
4 LaQuinta Club and Resort
5

6 *96 SSR members were in attendance at the start of the SSR Annual Meeting. It was*
7 *confirmed that there was a quorum.*
8

9 **I. President's Report – Cheryl Petersilge, MD**

10 Dr. Petersilge welcomed the membership to the 31st Annual Meeting. Special thanks were
11 given to all of the committee chairs and the members of the Executive Committee for
12 their dedication and commitment to the Society. It was noted that the Society relies on
13 the membership to submit abstracts and provide input for future programs. The Executive
14 Committee has worked hard to be responsive to the membership; every effort will be
15 made to continue to provide the membership with feedback to all requests/suggestions.
16 Dr. Petersilge acknowledged and thanked WJ Weiser & Associates, Inc., SSR's
17 management company. The membership was encouraged to visit the vendors who have
18 chosen to support the 2008 Annual Meeting. Their contribution to the SSR is greatly
19 appreciated.
20

21 **II. Approval of the Minutes of the 2007 Annual Meeting –Cheryl Petersilge, MD**

22 The Minutes from the 2007 Annual Meeting were presented to the membership for
23 approval.

24 **Action:**

25 The 2007 Annual Meeting minutes were unanimously approved as
26 presented.
27

28 **III. Secretary's Report – Carol Andrews, MD**

29 Dr. Andrews informed the membership that she has secured the venue for the 2009
30 Annual Meeting. The meeting will take place at the Wild Dunes Resort in the Isle of
31 Palms, South Carolina. The facility is beautiful and allows ample private meeting space.
32 The program committee is already working to finalize the scientific and social parts of
33 the program.
34

35 Dr. Andrews reported to the membership that the proposed bylaws change
36 regarding Article VII, requirements for a quorum, was approved by the
37 membership. The proposed bylaws change to Article VII received a 94.2%
38 approval. A total of 171 members voted of which 161 Members voted in
39 favor of adopting the proposed bylaws change.
40

41 **IV. Finance Committee Report**

42 Dr. Buckwalter presented a report from the Finance Committee. The current committee
43 members in addition to Dr. Buckwalter are Bill Morrison and Adam Zoga. The 2008
44 Annual Meeting was successful in receiving industry support in the amount of \$41,500.
45 The Balance Sheet as of February 27, 2008 reflects current assets of \$550,162. Revenue
46 as of February 27, 2008 exceeds expenses by \$154,643. As of March 6, 2008 there are a

47 total of 662 total members, 89 members did not owe dues (emeritus/applied/new) 37
48 members are unpaid. These members will be dropped from the SSR roster in the next
49 dues cycle. At the November RSNA meeting, the SSR Executive Committee reviewed a
50 proforma created by Ken Buckwalter to assess future funding needs of the Society. A
51 copy of the report was provided to the committee chairs. The main goal is to cover three
52 years of meeting/operating expenses. Based on growth of the Society as well as
53 anticipated inflation and return on Society assets, the organization is on track to maintain
54 an appropriate cash reserve level. The SSR Executive Committee is considering a small
55 dues increase for the 2008-09 year to help ensure the security of the Society. It was noted
56 that there has not been a dues increase for several years and that with a dues increase now
57 the dues would remain at the same rate for at least the next three years.

58
59

Action:

60 The Finance Committee report was approved as presented
61

62 **V. President Elects Report – Mark Kransdorf, MD**

63 Dr. Kransdorf provided a complete Annual Meeting program update to the Executive
64 Committee. Pre-registration is at 186. The SSR met the contracted room block with the
65 LaQuinta and staff worked to ensure all registered attendees were accommodated in the
66 hotel. All meeting attendees have paid their dues. New Member's were identified on their
67 badges for the 2008 meeting as requested by the Executive Committee previously. Dr.
68 Kransdorf confirmed that all requirements have been met for the SAMs sessions as well
69 as all necessary requirements for CME. There are two 90-minute sessions being held on
70 Monday, March 10, 2008. Dr. Kransdorf expressed concerns regarding the reducing
71 number of abstract submissions for SSR meetings. It was mentioned that SSR needs to
72 make the more senior members accountable for mentoring others to become members
73 and submit abstracts. There are currently 44 slots on the program; one slot was used for
74 Tom Berquist.

75
76

Action:

76 The report from the President-Elect was accepted as presented.
77

78
79

VI. Committee Reports

80
81

A. Audit Committee – Donald Sauser, MD

82 Dr. Sauser presented the complete audit prepared by Wolf, Weis & Horowitz, and LLC
83 for the year ended June 30, 2007. The accountant's independent review finds the
84 financial statements present fairly, in all material respects, the financial position of the
85 Society of Skeletal Radiology, Inc. as of June 30, 2007 and the results of its operation
86 and changes in its net asset and cash flows for the year then ended in conformity with
87 accounting principles generally accepted in the USA.

88
89

Action:

90 Each year WJ Weiser & Associates, Inc. will ensure that an outside audit
91 is prepared and presented to the Audit Committee Chair.
92

93 **B. Electronic Communications Committee – Catherine Roberts, MD**
94 Dr. Roberts presented the updated statistical details regarding the website to the
95 membership. The website continues to be very active. The funds received from Amazon
96 total \$355. while the funds collected relating to job listings is at \$1350 for the fiscal year.
97 The website maintenance fee is \$375 per month (\$4500 per year)
98

99 **Past items the committee has been working on include:**

- 100 a) coordination of request to add and revise website content
- 101 b) link to premier corporate members – discussed and denied
- 102 c) chat room/message board
- 103 d) free standing teaching
- 104 e) Socioeconomic page

105 **Future items the committee is working with the EC on include:**

- 106 a) Assist MOC/SAM Committee with online educational materials, as needed
- 107 b) Investigate integration of CME and SAM date into CME gateway
- 108 c) Request bid to expand member profile information

109
110 Dr. Roberts encouraged the members to communicate with her regarding any
111 ideas/suggestions for improving the website.
112

113 **Action:**

114 The report from the Electronic Communications Committee was accepted
115 as presented.
116

117 **C. Research Committee – Tim Mosher, MD**

118 One of the issues that the research committee has discussed at length is the concept of
119 “Research Paper Awards” . The Research committee felt that research awards for
120 papers/presentations may be redundant to the “outstanding paper awards” currently
121 allocated by the society and would be difficult to differentiate from these existing
122 presentation awards in a meaningful way. What the committee would like to propose
123 was the creation of a SSR “**young investigator award**”. Such an award would be
124 presented to a junior/young member for the most outstanding research presentation at the
125 annual society meeting. The committee felt that this would be a valuable award to
126 encourage research submissions from new investigators in the Society as well as to
127 provide recognition status for young MSK radiologists that could be meaningful and
128 important for them in furthering their academic/professional careers.
129

130 Another proposal that the Committee has discussed was allocation of SSR “research”
131 funding for support of research group communication. The committee feels that strength
132 of future SSR Research endeavors lies in the success of multi-institutional collaborative
133 research of Research interest groups. As such the Research Committee would like to
134 propose that some funding allocated for SSR “research”, be earmarked to facilitate
135 **structured meeting of research group members during the SSR annual meeting**. In
136 hope that such group meetings would foster improved communication and dedicated
137 discussion time for research group projects. One thought would be to allocate funding to

138 enable a “working” lunch, breakfast or dinner meeting of particular research groups at the
139 SSR annual meeting beginning this upcoming year.

140
141 An additional item that has been brought up is support for infrastructure items
142 necessitated by research group activities. In particular we would like to develop
143 infrastructure for electronic distribution of research material

144

145 **Action:**

146 The report from the research committee was accepted as presented.

147

148 **D. Residency and Fellowship Committee – Don Flemming, MD**

149 .

150 **Residency Curriculum**

151 The MSK Radiology Curriculum was published in the JACR. The committee has not received
152 any feedback about the document at this time.

153

154 **ABR Changes**

155 The education of residents will dramatically change starting in the 2009-2011 time frame. The
156 residency will consist of 36 months of general radiology training followed by 12 months of
157 electives in up to four topics. This may have an interesting impact on MSK radiology from a few
158 perspectives. 1) What happens if every resident in a particular year group wants to do MSK
159 radiology? 2) Will there be an increase in the number of residents from small institutions
160 requesting training from larger institutions?

161

162 **Website Update**

163 Dr. Flemming continued the annual effort of updating the fellowship listing page of the SSR
164 website. Six new listings have been added since the SSR 2007 Annual Meeting. There are a total
165 of 70 fellowship programs listed on the website. The links are operational. The website design is
166 satisfactory and used by the intended target population

167

168 **Fellowship Selection Process**

169

170 An attempt was made by both SCARD and the APDR to give structure and order to the
171 fellowship selection process. The APDR efforts spearheaded by David Yousem collapsed and no
172 national consensus opinion has been established. The committee took an informal poll of
173 programs regarding internal versus external fills. Thirty-two programs responded. Basically,
174 approximately one third to one half of MSK fellowship positions every year are filled by internal
175 candidates. By contrast, 15-20% of Neuro and Interventional Radiology are filled internally. Not
176 sure if that is a bad thing or not but it sure creates anxiety for those candidates that are applying
177 from outside a given program.

178

179 Several fellowships (Duke and UCSD) are offering fellowship training that includes no salary.
180 Interesting concept.

181

182 **Website**

183 Increasing our web presence with educational material is something that we should pursue. The
184 Committee is not sure that moving towards a teaching file is the ideal direction to go. It has its
185 plusses but web-based modular instruction similar to what Pediatric Radiology has accomplished
186 might be much more useful to program directors and residents. The downside of the module
187 construction is that it would take time and money as opposed to just throwing up teaching files.

188 Dr. Flemming polled the committee members and the three that responded agree that heading
189 towards modules would be more useful than teaching files. In the upcoming year, we will look at
190 the practicality of this endeavor both from an IT perspective and money (external funding such as
191 RSNA Education Grant, Woodward Grant, etc).

192
193
194
195
196
197

Action:

The report from the Residency and Fellowship Education Committee was accepted as presented.

E. Rules Committee – Lee Bennett, MD

199 Dr. Bennett presented the report from the Rules Committee. The committee members
200 include Jon Jacobson, MD; James Jelinek, MD; Glenn Tung, MD, FACR. The committee
201 acting upon recommendations of the President and Executive Committee held various in-
202 person and electronic meetings. The following actions were taken at the committee level:

203
204
205
206
207

Article VI, Sections 1 and 8: The changes address the requested name change to this committee. A full member and the executive committee requested the change. These changes received a majority vote approval by the Rules Committee.

208
209
210
211

Article VI, Section 6: The changes address the issue of unexpected committee vacancies. The Nominating Committee requested the change. These changes received unanimous approval by the Rules Committee.

212
213
214
215

Article VI, Section 11 and 12: The changes address ACR Councilor membership on these committees. Full members requested the change. These changes received unanimous approval by the Rules Committee.

216
217
218
219

Article VI, Section 13: The changes address the make-up of the Finance Committee. The Nominating Committee and Rules Committee requested the change. These changes received unanimous approval by the Rules Committee.

220
221

Action:

The changes to the bylaws were unanimously accepted as presented

222
223
224
225

F. Socioeconomic Affairs Committee – Jonathan Luchs, MD

227 Dr. Luchs presented a brief update regarding the committee activity, goals and
228 accomplishments.

1. Improve communication between the SSR and the ACR.

230
231
232
233

- The SSR executive committee has approved the request of the SEC therefore this year an ACR speaker will be at the SSR Business Meeting.

2. Orthopedic MRI self-referral per Chris

- 235
236
237
238
239
240
241
242
- There seems to be a concern amongst some MSK radiologists that Stark III will hinder Orthopedic surgeons from owning MRIs and thereby decrease potential MSK radiologist revenue (the final readers of these MRI's).
 - They fear that if the Ortho MRI is closed then they will not have the capital (with the DRA in effect) to buyout the MRIs from the Ortho Surgeons.

243 **3. Political Meeting Attendance, Participation, & Visibility**

- 244
245
246
247
248
249
250
251
252
253
254
255
256
257
258
259
260
261
262
263
264
265
266
267
268
- **March 3, 2007** Congressional Fund Raising New York Congresswomen Carolyn McCarthy RN, a strong supporter of physicians/radiologist and their needs/issues in Washington D.C.
 - **May 2007** ACR Annual Meeting and Chapter Leadership Conference (AMCLC).
 - Resolution # 29 - Pass
 - MSK ultrasound Practice Guidelines
 - Resolution # 37 – NOT Pass
 - DEXA
 - There were issues regarding wording and this was sent back to the committee for further review.
 - Resolution # 39 – Pass
 - Spine radiography in adults and children Practice Guidelines
 - Late Resolution # 48- Illinois - Pass
 - Referring to kick backs for and to imaging centers from and to referring physicians.
 - The legal system in Illinois is investigating this issue.
 - The ACR has created a resolution to better understand these relationships and then educate the ACR members and all radiologists.

269 **4. Joint Committee Action**

270 At the request of the Art De Smet and the CPT Advisory Committee the SEC have
271 worked on fragmentation of the MSK extremity MRI codes to more efficiently bill for
272 studies. Dr. Luchs has discussed joint submission of the new coding request with the
273 AMA. They agreed it was a needed change and led us down the proper channels.

274 **5. Call for Action**

- 275
276
277
278
279
280
- Join the ACR
 - Join RADPAC
 - ACR Booth at this years and future SSR meeting
 - Attend the 2008 ACR Meeting
 - Local Congressional Support and Fund Raising

281
282
283
284
285
286
287
288

321
322
323
324
325
326

6. SEC Communication and Contact with Membership

- The committee needs section on our web page to include SE issues in MSK radiology. The Chair has been in discussion with the ACR to gather information that is active in Washington D.C. and relevant to the MSK radiologist. This section would also include a link to the ACR webpage and a section that would allow the membership to contact (e-mail) the SEC Chair with issues, concerns and questions. (Previously requested by Dr. R. Boutin past SEC Chair).

The only way the SEC can make a difference is by knowing the economic concerns of our membership. Dr. Luchs introduced invited guest Dr. Chin from the ACR who provided a presentation regarding the Socioeconomic issues that the ACR is currently addressing and goals for ACR and SSR to work together in the future.

Action:

The report from the Socioeconomic Affairs Committee was accepted as presented.

G. Practice Guidelines and Technical Standards Committee – David Rubin, MD

Dr. Rubin provided an extensive report of the happenings of the Practice Guidelines Committee. The committee members include Hillary Umans, MD, Mihra Taljanovic, MD and Mark Anderson, MD. The Practice Guidelines and Technical Standards Committee (the “Standards Committee”) had a very unproductive year, meeting virtually none of its stated goals for 2007. The main setback began at the 2007 ACR Annual Meeting and Council Leadership Conference. The Standards Committee had authored a new Practice Guideline for the Performance and Interpretation of Wrist MR Imaging, co-sponsored by the SSR, which was voted on and approved at the ACR meeting. However, the Practice Guideline for the Performance and Interpretation of DXA, which the ACR requested us to extensively revise, met with 11th hour opposition at the ACR Meeting, when a single delegate successfully convinced the others that the revised Guideline contradicted recommendations published by other medical societies, leading to a rejection of the revised document. In fact, not only did the revised Guideline represent a purposefully crafted compromise with other societies’ publications, but also it was drafted in close cooperation with members of those societies, and any differences were based on newer data that had become available since the drafting of prior consensus documents. The revision, which was co-sponsored by the SSR with input from several of the members at large who have expertise in DXA, had gone through seven rounds of revision and ACR committee approval to ensure its content before being submitted at the ACR national meeting. And yet one ACR delegate was able to convince the College to reject it.

The upshot was that instead of a revised document, a severely outdated DXA Guideline from several years ago (that contradicts other medical societies’ Guidelines in much more relevant and substantial ways, which was the original impetus for soliciting the revision) remains in place. The committee was contacted by several ACR officers who saw this

327 outcome as a failure of their procedures. Likely as a direct result, the ACR has proposed a
328 new process for addressing the issue of collaborative guidelines, which may meet
329 resistance at the ACR Annual Meeting. The new proposal includes having a
330 representative of the SSR present at the ACR Meeting to express the SSR position and
331 rebut any dissention concerning the language of any co-sponsored Guidelines. There is
332 also a new process that will enable rapid consideration and debate of any proposed
333 amended language to a co-sponsored Guideline, which would then go back to the SSR for
334 final approval shortly after the ACR Annual Meeting (currently, any proposed change
335 triggers a complete 1-year cycle of re-evaluation through the various ACR
336 subcommittees).

337
338 Unfortunately, this new ACR proposal will take effect this coming year, meaning that the
339 majority of the Committee's work this past year was devoted to ushering another revision
340 of the DXA guideline through the ACR subcommittees, while actively seeking out
341 potential ACR delegates who may oppose it and engaging them in the vetting procedure.
342 The newest revision of the DXA document is on the slate for this coming ACR Annual
343 Meeting and I will attend the meeting as the SSR representative.

344
345 Mark Anderson reviewed and revised the ACR Guideline on Extremity Radiography, and
346 the revision has been reviewed by the Committee. The revision is being co-sponsored by
347 the SSR and has passed through the preliminary ACR review committees, so it will also
348 be up for approval at the ACR Annual Meeting in May.

349
350 For this coming year, the Committee would like to resume its main objective: authoring
351 new ACR Guidelines for the Performance and Interpretation of musculoskeletal MR
352 examinations. To date, seven new Guidelines have been written, co-sponsored by the
353 SSR and approved by the ACR. These include Guidelines on MR of the knee, shoulder,
354 ankle and hind foot, pelvis and hips, elbow, wrist, and bone and soft tissue tumors. This
355 year the Committee plans on submitting new guidelines for MR of the hands and feet,
356 and MR of bone and soft tissue infection. These will bring us close to fulfilling our goal
357 of having a complete and comprehensive set of Practice Guidelines for all of
358 musculoskeletal MR imaging. The final topics -- MR imaging of Muscle pathology, of
359 extremity stress injuries, of the TMJs, and of peripheral arthritis -- will likely be
360 addressed in the following cycle, and then an Introduction relevant to all of the MSK MR
361 guidelines (including issues of MR arthrography, intravenous contrast use, low-field
362 imaging, and dedicated extremity scanners) will be penned the following year. After that,
363 it is anticipated that the major role of the SSR Standards Committee will shift to one
364 where the established Guidelines are revised on a rotating basis.

365
366 The Committee also seeks advice from the Executive Committee and other Committee
367 Chairs for strategies to directly involve and update SSR members who serve as ACR
368 delegates. As a broader initiative, the committee would like to propose that the SSR
369 establish a databank (first proposed last year by Bonner Guilford) of the various
370 affiliations and leadership positions that each of its members has with other medical
371 societies. This information could be solicited on a voluntary basis from members through
372 an e-mail or in-person questionnaire, web survey, or the main SSR web page, and can be

373 maintained in a password-protected environment, similar to the membership contact
374 information, available to other SSR members.

375
376 The secondary role of the Standards Committee continues to be advisory to other
377 societies who draft standards that directly or indirectly pertain to musculoskeletal
378 radiology. These currently include the Radiologic Society of North America (RSNA), the
379 American College of Occupational and Environmental Medicine (ACOEM), and the
380 National Council on Radiation Protection & Measurements (NCRP). The Committee also
381 provides input to ad hoc ACR Committees other than those directly involved in the ACR
382 Standards and Guidelines program, which take up issues pertinent to musculoskeletal
383 radiology, like the accreditation of extremity scanners or the proper coding for MR
384 examination in rheumatoid arthritis patients.

385
386 **Action:**

387 The report from the Practice Guidelines and Technical Standards Committee was
388 accepted as presented.

389
390 **H. Membership Committee Report – Laura Bancroft, MD**

391 Dr. Bancroft provided a detailed membership report. As of the meeting date, only 37
392 members have not paid their 2008 dues. Those members will be dropped from the
393 membership roster. The committee has worked hard to review and process member
394 applications in line with the newly established rolling admissions process. The SSR
395 membership total is 579 full members plus 13 international members and 6 emeritus
396 members for a total of 610 members. The international members reflect 5 members from
397 Australia, 2 members from England and one member each from India, Ireland, Japan,
398 Malaysia, Saudi Arabia and Spain. The majority of SSR 2008 applicants are coming
399 from the Northeastern part of the United States, which is consistent with the historical
400 membership records for the last few years. New members will be identified at the
401 Annual Meeting with name badges that indicate New Member. The EC asked the
402 Committee Chairs to make an effort to meet and welcome these new members.

403
404 **Action:**

405 The report from the Membership Committee was accepted as presented.

406
407 **I. Nominating Committee – Kirk Davis, MD**

408 Dr. Davis presented the report from the Nominating Committee.

409
410 **RULES COMMITTEE:**

411
412 **Current members:**

		<u>Term</u>
Darus Lee Bennett (“Lee”), MD	Chair 2007-09	2005-09
James S. Jelinek, MD		2005-09
Jon Arthur Jacobson, MD		2007-11
